Carbon Management Consultants

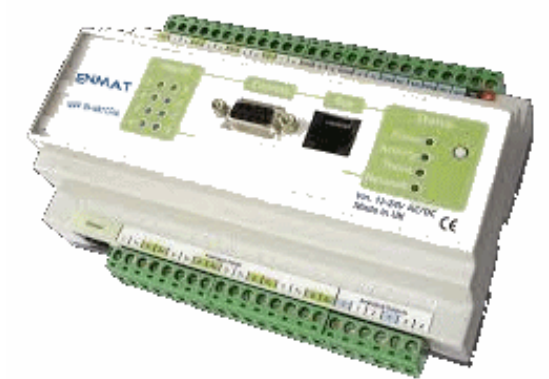

Our range of Data Loggers are designed to make it easy and safe to measure energy consumption, and to record the metered data from all kinds of meters including electricity, gas, water and heat.

ENMAT Premium Data Logger

- 8 Pulse Inputs and 8 Analogue CT Inputs
- Modbus RTU and TCP/IP communications
- 64 capacity channels via the MODBUS interface
- Time Synchronisation with a built in battery via SNTP to a time server
- Hardware powered by a high speed ARM® processor
- Data automatically sent to ENMAT Cloud Software

ENMAT Wireless Data Logger

- Built in Ethernet and GSM/GPRS Modem
- Embedded RTU Serial Port
- External TCP/IP Modbus Slave Device Driver
- Built in battery backed clock with auto sync via internet
- Data automatically sent to ENMAT Cloud Software

GSM: GPRS
General Packet Radio Service

ENMAT Lite Data Logger

- 3x pulse inputs
- Supports Electricity, Gas and Water Meters
- Ethernet Interface
- Data automatically sent to ENMAT Cloud Software
- LED Sensor turns any electric meter into a “smart meter”
- Non-invasive LED Sensor means no need to cut electrical supply for installation
